

Hinged Elbow Brace

Application Instructions

1. APPLY BRACE

Loosen all straps. Slip brace onto affected arm.

2. POSITION THE BRACE

Align the hinges with the center of the elbow joint.

FRONT VIEW

5. SECURE CROSS STRAPS

Begin with the outside cross strap first, loop the strap through the D-ring, pull back to tighten and press to close.

Repeat for cross strap located closest to the inside of the arm.

BACK VIEW

FRONT VIEW

Repeat with strap located at the biceps muscle (front side of the arm).

3. SECURING UPPER STRAPS

Start with the strap located on the back of the brace, closest to the triceps muscle (back side of the arm). Loop the strap through the D-ring, pull back to tighten and press to close.

4. SECURE LOWER STRAP

Locate the strap at the forearm. Loop the strap through the D-ring, pull back to tighten and press to close.

BACK VIEW

Note: Final positioning should be determined

by a medical professional.

6. REMOVE THE BRACE

Loosen all straps and slide brace off the arm, over the hand.
